Product Description for Consumer Care

Easy Ag[®] Antimicrobial Tubular Digit Sleeve Dressings

Product Description:

The Easy Ag[®] Antimicrobial Digit Sleeve Dressing is a sterile, tubular burn and wound dressing which is applied to wounds on the digits of the hands (fingers) or feet (toes). The Digit Sleeve Dressing can be cut into varying lengths and is useful in wounds that span over more than one finger or toe. The Easy Ag[®] Digit Sleeve Dressing is particularly effective in eliminating [MRSA Infections](#). This dressing is cost effective and easy to use making it ideal for use on multiple outdoor wound injuries and athletic wound injuries on the fingers and toes.

Silverlon[®] Tubular Dressings used by the US Army in Iraq

This US Soldier had left hand extensor tendon repairs after sustaining lacerations when he fell into concertina wire. The wounds were closed primarily after irrigation with vessel loop drains (removed at 24 hours) and were dressed with the Silverlon[®] Digital Wound Dressings.

Approved FDA & Canadian Ministry of Health Indications

Easy Ag[®]/Silverlon[®] Antimicrobial Digit Sleeve Dressing is an effective

antimicrobial barrier for wounds and burns including: 1st and 2nd degree burns, full and partial thickness wounds, blisters, or bites.
