Easy Ag<sup>®</sup>/Silverlon<sup>®</sup> Wound Care and Burn Care Products provide the safest and strongest multi-day antibacterial, antifungal, and antimicrobial protection available to consumers today. The silver coated nylon fabric is safe and effective protection for burns, incisions, skin grafts, lacerations, abrasions, dermal ulcers, rashes, animal bites, and insect bites. Easy Ag<sup>®</sup>/Silverlon<sup>®</sup> Wound Dressings have been shown to be an effective treatment against stubborn MRSA Infections. Easy Ag<sup>®</sup>/Silverlon<sup>®</sup> Dressings deliver a speedy and sustained kill against MRSA Bacteria.

Easy Ag<sup>®</sup>/Silverlon<sup>®</sup> Dressings work best when the product is kept clean, moist and in good contact with the affected area, and may be used for both diabetic and pediatric care. It has also been reported that when used quickly after injury, Easy Ag<sup>®</sup> Wound Contact Dressings help to reduce swelling, inflammation and pain. In many instances, our Wound Care Products have been shown to be effective in the treatment of chronic wounds and chronic ulcers, also.

To date, Easy Ag<sup>®</sup>/Silverlon<sup>®</sup> Dressings have been used primarily by professional health care providers. These include prominent private and university hospitals such as Johns Hopkins, the Mayo Clinic, Northwestern University, the [University of Michigan](#), and Baylor University as well as several active [Military Units](#) in Afghanistan, Iraq and Germany. Easy Ag<sup>®</sup>/Silverlon<sup>®</sup> wound bandages are simply the most effective, durable and easy to use antimicrobial product on market. Now, select Advanced Wound Care and Burn Care Products are available for you. All Easy Ag<sup>®</sup>/Silverlon<sup>®</sup> Wound Care Products listed above have **FDA Clearance**. Argentum Medical, LLC is a member of the [Wound Care Education Institute](#), and a member of the [National Alliance of Wound Care](#).

**Wound Contact Dressing Testimonials:**

*Excellent product. Experienced dramatic change in wound healing in just 2 days from initial usage. In one month time, size of wound has decreased significantly. Product is easy to use, clean, etc. We are definitely advocates for your Easy Ag/Silverlon product and will and have already recommended the product (and our personal outcome while using) to our friends and family. This product was what our family needed to turn the corner from a chronic necrotic wound to one that actually looks like it is healing.*

*My first experience with Easy Ag/Silverlon was in 2001 after I had dislocated a shoulder in a skiing accident. The pain from the injury kept me awake most of the night until I had a harness constructed that directly applied Silverlon to the Joint. From the very first night of use the pain disappeared and never came back again while the Silverlon harness was used. After that I began applying Easy Ag/Silverlon contact dressings to my hips and knees during exercise and experienced none of the pain in those areas that I had been enduring for years. Finally, I had a pair of Silverlon shorts made that I now wear during hiking or whenever hip pain appears and have experienced total relief. For arthritic, inflamed areas of the body, I know of no better remedy than the application of a Silverlon contact dressing.*

*G. Osman*
